OFFERINGS

Realized Technologies specializes in the development of products requiring electronic hardware and software.

Our clients use us to:

Fix Solve difficult problems, intermittent system errors, lockups, and field failures. *Our team has developed specific troubleshooting methodologies for rapid problem identification and robust solution development.*

Finish Complete projects on hold to start generating revenue. Meet a rapidly approaching deadline. Free up your new product development staff. *Our experienced staff can take over at any stage of development. We complete all work necessary to bring your project to completion.*

Create Develop robust systems that meet specifications and user expectations. Find and evaluate new cost effective technologies. Perform proof of concept prototyping. Make modifications to existing platforms. *Using proven development methodologies, we take advantage of key new technologies and leverage industry innovations to create new products. We can decrease size or weight, reduce cost, increase functionality, or enhance reliability of existing products.*

- **Embedded Systems Design**
- **Electronic Hardware Development**
- **Software Development**
